- **Per-assessment Charges**
\$5K-\$20K per assessment, depending on size and customization.
- **Customization Fees**
\$2K-\$10K for adapting language, benchmarks, or formats.
- **Reporting & Consulting**
\$250-\$500/hr for analysis, interpretation, and recommendations.
- **Annual Licensing Traps**
Enterprise contracts (\$50K-\$250K+) that rise with headcount or "mandatory upgrades," even when usage stays flat.

2. Traditional assessments are slow, expensive, and vendor-dependent.

AssessCenter changes that—giving HR teams, consultants, and change agents the power to design, analyze, and act with speed and precision.

3. Drive Up Performance & Engagement

https://www.thrivesparrow.com/blog/performance-management-statistics?utm_source=chatgpt.com

Organizations using AI-driven performance reviews report a 71% increase in employee engagement, a 50% improvement in goal achievement, and a 33% reduction in bias during assessments.

4. Boost Productivity with AI Assistance

https://www.virtasant.com/ai-today/ais-influence-on-corporate-cultures-insights-from-amazon-sprintit-and-hp?utm_source=chatgpt.com

In contexts beyond HR—like customer support—generative AI tools have increased worker productivity by 15%, with particular gains among less experienced workers.

5. Strengthen Culture & Collaboration

https://www.virtasant.com/ai-today/ais-influence-on-corporate-cultures-insights-from-amazon-sprintit-and-hp?utm_source=chatgpt.com

Enterprises implementing broader AI solutions saw 79% of employees reporting positive changes in workplace efficiency and cultural dynamics, with 87% noting enhanced collective learning and 78% improved collaboration.

6. Reduce Turnover & Improve Retention

https://hirebee.ai/blog/ai-in-hr-statistics/?utm_source=chatgpt.com

A SHRM report found that organizations using AI in feedback processes achieved a 22% increase in employee retention.

About Us

We know what it's like to sit in a boardroom, surrounded by reports that don't answer the real questions.

For years, we worked as consultants, coaches, and leaders inside organizations – watching teams struggle with misalignment, burnout, and stalled change efforts. The tools promised insight, but too often delivered only glossy reports and vague answers.

We know what it's like to sit in a boardroom, surrounded by reports that don't answer the real questions.

For years, we worked as consultants, coaches, and leaders inside organizations – watching teams struggle with misalignment, burnout, and stalled change efforts. The tools promised insight, but too often delivered only glossy reports and vague answers.

Our Story: From Frustration to Freedom

We've spent years as consultants, coaches, and leaders, walking inside organizations trying to navigate complexity. We've sat in boardrooms thick with tension, held space for teams on the edge of burnout, and designed frameworks to bring clarity where confusion ruled.

Time and again, we saw the same problem: organizations wanted real insight but got stuck with glossy reports, delayed data, and vague answers. Momentum slipped, trust eroded, and change efforts fizzled. So, over hot chocolate, coffee, and shared frustration, we asked: *"What if we stopped trying to fix broken tools—and built our own?"*

That spark became **AssessCenter** – an AI-powered assessment platform built for leaders, HR teams, and coaches who want **faster, deeper, and more human insights**.

What We Dreamed Of

We imagined a platform that:

- Gives **speed without losing depth**
- Provides **insights that lead directly to action**
- Uses **AI to amplify human wisdom, not replace it**

And we refused to compromise on:

- **Ethics and transparency**
- **User control and flexibility**

And so, AssessCenter was born.

What We Built

AssessCenter is more than a tool, it's a partner. With it, you can:

- Create **custom assessments** without needing a data science degree
- Get **real-time reports and AI-powered recommendations**
- Build **action plans** that turn strategy into measurable results

No cookie-cutter templates. No vendor lock-in. Just clarity, adaptability, and momentum.

Why It Matters

Because **insight shouldn't be a luxury**. Because leaders deserve tools that meet them where they are. Because transformation starts with understanding – and understanding starts with asking the right questions.

If you've ever felt stuck between knowing and doing, if you've wished for a tool that fits *your* context instead of someone else's template, then AssessCenter was built for you.

Join us – and let's reshape how organizations **learn, grow, and lead with clarity and courage**.

Our Mission

We empower organizations to take full ownership of their growth journey by providing an AI-powered platform that enables them to create custom assessments, generate intelligent insights, and drive impact—all on their terms.

Our Vision

To make meaningful insight and action accessible to every organization—by transforming the way assessments are created, understood, and used to drive real change.

Our Tribe

We're a team of change practitioners, organizational psychologists, technologists, and culture transformation experts who believe that assessments shouldn't be static, expensive, or disconnected from action.

AssessCenter Pre-Launch Website

How it Works

Our intuitive process makes taking assessments and driving development simple, relevant, and impactful.

[Join Waitlist](#)

Step 1

Create or Choose

Select from our comprehensive assessment library or create custom assessments tailored to your specific needs and goals.

Welcome! Would you like to...

Search and use off-the-shelf assessments

Customize off-the-shelf assessments to make it your own

Create your assessment from scratch

Step 2

AI-Powered Assessment

Our advanced AI guides participants through personalized assessments, adapting questions based on responses for deeper insights.

Describe the assessment you would like to build

The Organizational Climate Assessment is a structured diagnostic tool designed to capture employee perceptions and experiences across multiple dimensions of the workplace environment. It evaluates the collective norms, values, behaviors, and systemic factors that shape day-to-day employee experiences and influence organizational health.

AI help me improve

AI suggest description

Step 3

Analyze & Report

Receive detailed, actionable reports with AI-generated insights and recommendations sent directly to relevant stakeholders.

Understanding the Report

Let's start by reading what the numbers are telling us. Your organization's overall culture score is 66%. That means there's a good foundation, but also plenty of room for strengthening.

Highlighting Priority Areas

If we look at the spread, loyalty (63%) and subculture strength (66%) stand out as areas that could drag down performance if left unaddressed. On the positive side, satisfaction (69%) and emotional culture (68%) are your stronger levers – these can be built on.

Curating Action Plans

Here are three tailored actions you could consider, based on the data:

For Loyalty (63%)

- Conduct stay interviews with a cross-section of employees.
- Introduce recognition programs (peer-to-peer, not just top-down).
- Explore career progression clarity: do people see a future here?

For Subcultures (66%)

- Launch cross-functional projects to break silos.
- Create shared rituals/events that bring different groups together.
- Align leaders on key cultural behaviors to model consistently.

As your AI coach, I'll guide you in implementing these actions step by step.

What action would you like to work on first?

Step 4

Drive Impact

Implement AI-coached development plans and track progress with continuous monitoring and improvement suggestions.
